

David Lindeman

CS 3321

Team Feedback Sprint 2

David Lindeman:

Grade: A,

Percentage of work: 25%,

Responsibilities: I finished the library that will be used to create SVG shapes for both Wireframe and IFML objects.

Tasks were completed

Participation: I was incredibly involved

I took on the task of maintaining the health and quality of the git repo assisting members when merge conflicts arise and when they are unsure of how to use git.

Hyunseo:

Grade: B,

Percentage of Work: 15%

Group Participation: This person completed all assigned work but was not otherwise involved

Due to illness we were not able to see his work product at our meeting during the week before break so I am unable to know if he actually finished his work.

Steven

Grade: B,

Percentage of Work: 10%

Group Participation: This person completed all assigned work but was not otherwise involved

Though this group member has certain challenges in his life I have not yet seen a work product for him, though I know he is currently working on the SVG and PDF file transformations.

Traae

Grade: A,

Percentage of Work: 25%

Group Participation: This person was incredibly involved

Traae really went above and beyond working with everyone and researching the server information for the project

Tyler:

Grade: A,

Percentage of Work: 25%

Group Participation: This person completed all assigned work but was not otherwise involved

Tyler has done a great job setting up the model for the UI of the desktop application and helping other group members better understand the direction for the UI elements of this project.
