

REQUIREMENTS ELICITATION, SPECIFICATION, AND VALIDATION

DR. ISAAC GRIFFITH

IDAHO STATE UNIVERSITY

- Starting at 15:02
 - You will have 5 minutes
 - You may not use your notes, books, lectures, or the internet
 - You may not help each other

Passcode

8055

1. Form groups of three or four. (For those on Zoom, you will have to do all the thinking on your own.)
2. We are going to consider the following issues with Release Engineering in the context of a Scrum-base project (as we will with your projects)
 - How might we integrate release engineering activities into the Scrum setting?
 - Who will be charged with handling release engineering activities?
 - What issues would the Scrum process mitigate when it comes to release engineering?
 - What issues are added by the Scrum process when considering release engineering?
 - What type of documentation is expected to be generated during release engineering while using Scrum?
3. As a group discuss each of these over the next 40 minutes or so
4. We will then discuss your thoughts for the remainder of the class period.
