Sprint 3 Team 4 evaluation

I am Grant Baird. I am responsible for getting vue to work and getting the web front end to work. I would give myself a B+. My actual results were lackluster this sprint but there were results and I know that I put in at least a B+/A- grade worth of effort. I completed about 33% of the work. I got a demo front end posted that I will be adding to. My participation is great. I attend every meeting that I can, and I actively involve myself in them.

First partner is Coby Garner. He deserves an A. He completed 33% of the work. Coby is very involved with the group and in meetings.

Second partner is Sushan Manandhar. Sushan deserves an A. He's done about 33% of the work. Sushan is also very involved.

Everyone in the group works well and is very involved. We're going to be trying to incorporate scrum and essence concepts over this next sprint. I feel that the team works well together.
