Self-Evaluation

Tyler Kelley

My responsibilities in the group for this sprint was to do research on javafx and fxml. After the research I was to implement the classes and update the classes I have in the class diagram. I also updated the wiki so that it was up to date with our current project. Finally my last job was to get a test page up for javafx and have it be ready to implement our project

Grade A+

Percentage of work 30%

I completed all of my tasks available to me

I was incredibly involved

Team member evaluation

Traae Bloxham

Grade A+

Percentage of work 30%

This person was incredibly involved

Team member evaluation

David Lindeman

Grade A

Percentage of work 20%

This person was incredibly involved

Team member evaluation

Hyun Se Seo

Grade C-

This person completed most of the work but other group members completed more and were more involved

Team member evaluation

Steven Yerka

Grade C-

This person completed most of the work but other group members completed more and were more involved

Team Use of Scrum and Essence

Our team has been utilizing scrum by having daily scrum meetings every week. During this sprint we made use of the requirements essence card to have the team know what requirements we need to fulfill throughout our project. Some issues we've been having is using the project board during our sprints. Not everyone is moving the cards or adding new cards to the project board leaving gaps throughout the sprint.
