Sprint 4 Team Review Team 4

My name is Grant Baird. My responsibilities in the group were to learn vue and develop the web frontend. I believe that I deserve a solid B+ or A-. I completed about 33% of the work. There were more things that I would have liked to have implemented but I completed my tasks. I was very involved in the group.

The next member in my group is Coby Garner. Coby deserves an A. Coby completed about 33% of the work. Coby was very involved in the group.

The next member in my group is Sushan Manandhar. Sushan deserves an A. Sushan completed about 33% of the work. Sushan was very involved in the group.

The team worked from a list of things we needed to accomplish. We met 3 times per week to stay up to date with what the other members were doing.

Overall I am very happy with the team results and progress. The first half of the semester was rough getting the team situated with all of the member changes. The final group we ended up with was a very good group to work with.
