Peer Evaluation:

Part 1 - Self-Evaluation:

sina khajehpour

In sprint1, I was part of the team member and responsible for creating a server and working with Javalin as requirements for our project.

A   25%

I implemented the initial server and working on connecting the client to the server.

I completed my tasks

I was involved.

Part 2 - Team Member Evaluation
1. Benjamin Keninger- Product Owner

A   25%

This person was incredibly involved.

2.   Braxton Soto- Scrum Master

A   25%

This person was incredibly involved

3.   Thomas Evans- Team Member

   A   25%

This person was incredibly involved

Part 3 – Team Use of Scrum and Essence

We use basic concept of scrum and essence for Sprint1 by assigning the scrum roles and having meetings during the week. In our meeting we try to follow up the rules of scrum but in couple of meetings, we had to extend our meeting's time and, in some cases, we did not have all the members at the same time. For improving our method and tackling these problems, we also use online method so every member is involved in whatever changed.
