Part 1: Self-Evaluation

- Benjamin Keninger
- For this Sprint 1, I was the product owner
- Assign yourself the grade: A
- What percentage of the work did you complete? 25%
- Did you complete your tasks? Yes, I completed all the tasks I was responsible for and gave my team time to review my work before submitting.
- How would you rate your participation in this group? (choose one of the following)
  - I was incredibly involved.
  - ~~I completed my work but was not otherwise involved~~
  - ~~I completed most of the work assigned to me but other group members contributed more than I did~~
  - ~~I did not contribute~~

Part 2 - Team Member Evaluation

- Braxton Soto
- Assign this person a grade: A
- What percentage of the work did this person complete? 25%
- How would you rate their participation in the group? (select one of the following)
  - This person was incredibly involved
  - ~~This person completed all assigned work but was not otherwise involved~~
  - ~~This person completed most of the work assigned but other group members contributed more~~
  - ~~This person did not contribute~~

- Sina Khajeh Pour
- Assign this person a grade: A
- What percentage of the work did this person complete? 25%
- How would you rate their participation in the group? (select one of the following)
  - This person was incredibly involved
  - ~~This person completed all assigned work but was not otherwise involved~~
  - ~~This person completed most of the work assigned but other group members contributed more~~
  - ~~This person did not contribute~~

- Thomas Evans
- Assign this person a grade: A
- What percentage of the work did this person complete? 25%
- How would you rate their participation in the group? (select one of the following)
    - This person was incredibly involved
    - ~~This person completed all assigned work but was not otherwise involved~~
    - ~~This person completed most of the work assigned but other group members contributed more~~
    - ~~This person did not contribute~~

Part 2b - Explanation

For Sprint 1, as there was relatively little to do, it was cumbersome to distribute the workload in an equal manner. As such, Thomas ended up doing more work than the rest of us as he established a lot of the foundation we will work on in later Sprints. Regardless, I believe that all of us contributed an acceptable amount of work for the Sprint.

Part 3 - Team Use of Scrum and Essence

Our team has been working using Scrum by utilizing the Scrum roles, employing iterative development (though this is built-in to the project) and by following a project board on GitHub. While we do have meetings, we don't do "daily" standup meetings and also don't strictly ask the 3 questions in the traditional Scrum way. However, I would consider these less like "issues" and more akin to adaptations to the Scrum cycle.
